DISCRETE MATHEMATICS
VOLUME 150, NUMBERS 1–3, 6 APRIL 1996

CONTENTS

Preface 1

J. Abrham and A. Kotzig
Graceful valuations of 2-regular graphs with two components 3

K.T. Balińska and L.V. Quintas
Degrees in a digraph whose nodes are graphs 17

C.A. Barefoot, L.H. Clark, R.C. Entringer, T.D. Porter, L.A. Székely and Z. Tuza
Cycle-saturated graphs of minimum size 31

A. Bialostocki, H. Lefmann and T. Meerdink
On the degree of regularity of some equations 49

M. Bóna and G. Tóth
A Ramsey-type problem on right-angled triangles in space 61

M.S. Chung and D.B. West
Large $2P_3$-free graphs with bounded degree 69

G. Csizmadia
Furthest neighbours in space 81

P. Erdős, T. Gallai and Z. Tuza
Covering and independence in triangle structures 89

R.J. Faudree, R.J. Gould, M.S. Jacobson, J. Lehel and L.M. Lesniak
Graph spectra 103

O. Favaron
Least domination in a graph 115

A. Geroldinger and R. Schneider
The cross number of finite abelian groups III 123

I. Gutman and A. Ivić
On Matula numbers 131

J. Harant, P.J. Owens, M. Tkáč and H. Walther
5-regular 3-polytopal graphs with edges of only two types and shortness exponents less than one 143

P.E. Haxell
Atoms of set systems with a fixed number of pairwise unions 155

W. Imrich and J. Žerovnik
On the weak reconstruction of Cartesian-product graphs 167

S. Jendroľ, M. Tkäč and Z. Tuza
The irregularity strength and cost of the union of cliques 179

H.A. Kierstead and V. Rodl
Applications of hypergraph coloring to coloring graphs not inducing certain trees 187

M. Klazar
Extremal functions for sequences 195

K. Kolossa
On the on-line chromatic number of the family of on-line 3-chromatic graphs 205

D. Kratsch, J. Lehel and H. Müller
Toughness, hamiltonicity and split graphs 231

M. Kubale and K. Piwakowski
A linear time algorithm for edge coloring of binomial trees 247

M. Laurent
Hilbert bases of cuts 257

T. Lengyel
On some properties of the series $\sum_{k=0}^{\infty} k^n x^k$ and the Stirling numbers of the second kind 281

R.-M. Madani
Characterization of Laborde–Mulder graphs (extended odd graphs) 293

S. Matić-Kekić, D.M. Acketa and J.D. Žunić
An exact construction of digital convex polygons with minimal diameter 303

M.D. Plummer
Extending matchings in planar graphs V 315

N. Polat
Stable graphs for a family of endomorphisms 325

D.-R. Popescu
Une méthode d'énumération des cycles négatifs d'un graphe signé 337

M. Raczunas and P. Chrząstowski-Wachtel
A Diophantine problem of Frobenius in terms of the least common multiple 347

J.-F. Saclé
Lower bounds for the size in four families of minimum broadcast graphs 359

S.-I. Tokunaga
On a straight-line embedding problem of graphs 371

K. Vesztergombi
The two largest distances in finite planar sets 379

H. Walther
A nonhamiltonian five-regular multitriangular polyhedral graph 387

M. Woźniak
Packing three trees 393

Notes

K. Ando, A. Kaneko and S. Gervacio
The bandwidth of a tree with k leaves is at most $\lceil \frac{k}{2} \rceil$ 403

E. Boros and R. Meshulam
On the number of flats spanned by a set of points in $PG(d, q)$ 407

S. Brandt and E. Dobson
The Erdős–Sós conjecture for graphs of girth 5 411

P. Brass
On the Erdős-diameter of sets 415

S.N. Buzeţeanu and V. Domocoş
Polynomial identities from weighted lattice path counting 421

I. Hoffman and A. Soifer
Another six-coloring of the plane 427

P. Mihók
On the minimal reducible bound for outerplanar and planar graphs 431

D. Miklós and A. Telcs
Fully extended self-avoiding polygons 437

D. Miklós
Product of association schemes and Shannon capacity 441

V. Petrović
Decomposition of some planar graphs into trees 449

I. Tomescu
On the number of irreducible coverings by edges of complete bipartite graphs 453

M. Voigt
Choosability of planar graphs 457
